

Basic Aluminum Weld Station MWS-AL-Basic

Basic Aluminum Weld Station

The Basic Aluminum Weld Station is designed to meet all of your aluminum repair needs. The AL-5 Capacitor Discharge Stud Welder is designed for aluminum & steel dent pulling on UHSS panels. The AL-5 applies weld studs with the smallest possible heat affected zone, resulting in minimized damage to the backside. Different accessories are available to then pull any dent, from a small ding to a large crease.
